MUSCLE MEMORY
GUILLERMO BERNAL

LiveLeak

THIS?

A stylized illustration of a hand holding a brain, with a dotted circular border around it. The hand is dark blue, and the brain is a lighter blue. The background is a solid dark blue color.

Haptic memory or Muscle memory is a form of sensory memory that refers to the recollection of data acquired by touch after a stimulus has been presented. Haptic memory is used regularly when assessing the necessary forces for gripping and interacting with familiar objects.[1]

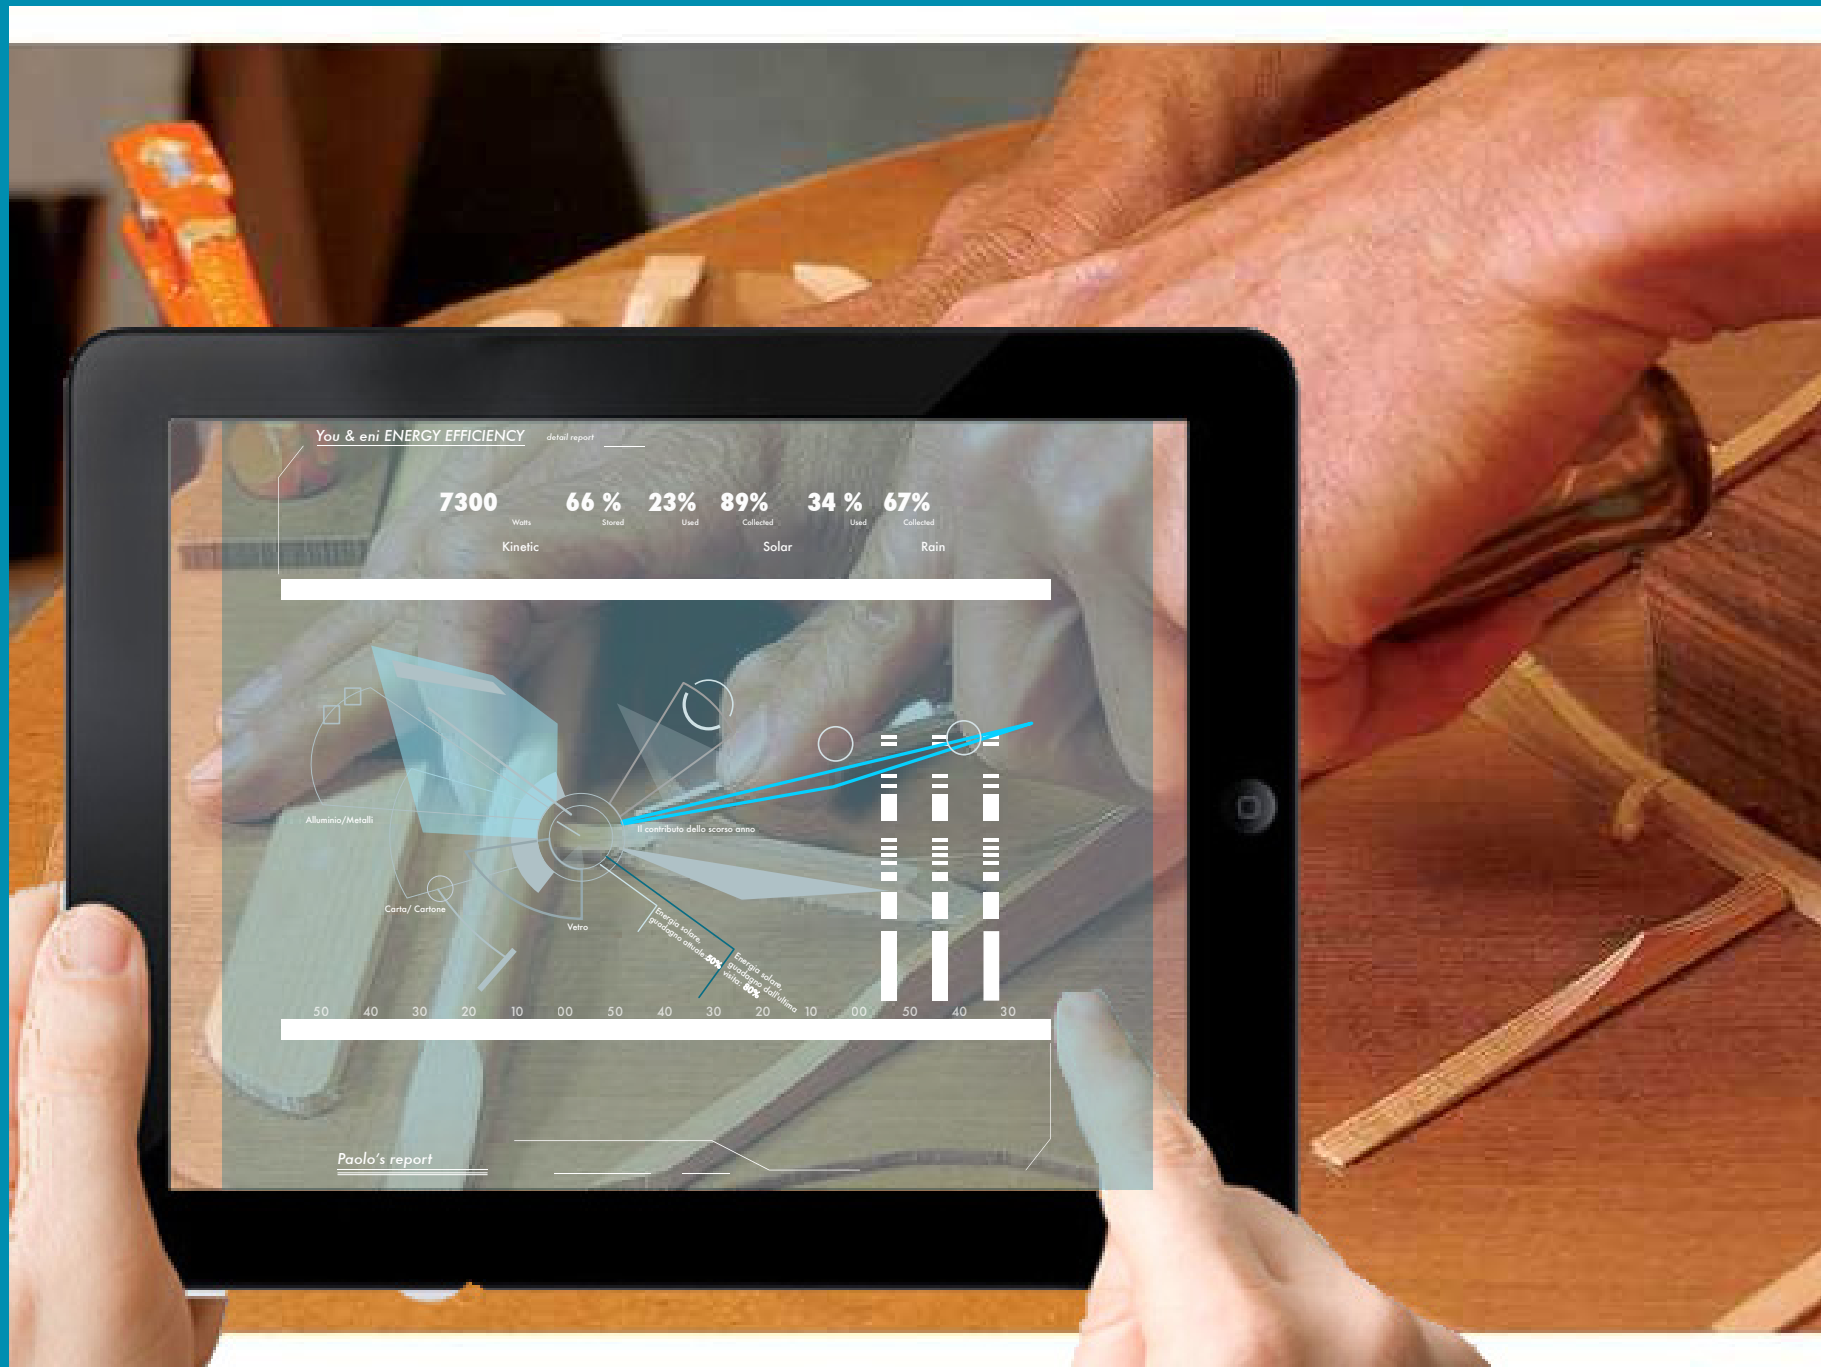

WHY BOTHER WITH THIS ???

LARGE NUMBER OF CRAFTS REQUIRE MANY YEARS OF WORKING WITH A MATERIAL TO GAIN HAPTIC KNOWLEDGE.

WHAT IF WE HAD A HAPTIC FEEDBACK TOOLS?

SOMETHING THAT HELP US UNDERSTAND SOMEONE
ELSE MUSCLE MEMORY.
